

RP-003 Description

High-low signals by switching to MCU, The Encoded data sent to the RF module, Oscillation in the RF module to the 2.4G frequency modulation, then transmit the signal by antenna.

- 1 . Voltage : 3VDC
- 2 . dynamic current : 4-6mA
- 3 . quiescent current : 0.04-0.06mA
- 4 . Frequency : 2.4GHz
- 5 . Modulation : GFSK
